Java/Angular

SUMMARY:

Current Infosys associate seeking to gain knowledge and additional skills applicable to UI/UX design, testing and automation, as well as relational database creation and maintenance. My background illuminates focus on Java/Angular structures, including Spring framework and Hibernate, relational database structuring concepts such as SQL and NoSQL, and experience with microservices and cloud computing. Prior to the pursuit of technical experience in software development, I served in the US Army and was recruited to the field of Information Technology, specializing in network security and software/hardware troubleshooting.

Skills:
- Backend: Java (Libraries, Spring Framework, Spring MVC, Spring Boot, Maven, Gradle, Apache Tomcat)
- Frontend: Angular, HTML5 Boilerplate, CSS, JavaScript
- Database Creation and Management (SQL – PostgreSQL, MySQL(DBeaver), NoSQL – MongoDB)
- Microservices and Cloud Computing (Postman API, Bootstrap, AWS, Elastic Beanstalk, Docker)

Operating Systems: Windows 10

Languages: Java(ver.8, 11, & 17), Angular, JavaScript, Groovy.

Databases: SQL (PostgreSQL), NoSQL (MongoDB)

Tools: Eclipse, VS Code, IntelliJ IDEA, MongoDB, DBeaver, Spring Tool Suite 4, Github, Postman, Node.js, Express.js, Amazon Web Services, Git Bash, Docker.

PROFESSIONAL EXPERIENCE:

Infosys Ltd

InfyBank Internal Application   Oct – Nov 2022

- o   Granted a lead developer role for creating a banking application, responsible for UI/UX design and styling.

- o   Developed foundation for overall design of the entirety of the application working with 15 others on frontend and backend endeavors. Made utilization of Angular Material framework and integrating fellow developers on the implementation of code

Infosys Ltd.

InfyBench Tracker Application
Lead Developer

- o   Created user input system on a bench tracking application for all Infosys associates and managers. Currently overseeing the frontend endeavors of this application and helping new developers to the project acclimate to the codebase

- o   Worked closely with PMO and Managers in order to achieve optimal functionality and design satisfaction utilizing Angular Material and Primeng frameworks. Designed tables and feedback forms that are still seen on the project.
